

Together, we're future-ready

We have reached the light at the end of the tunnel

Business and society at large are starting to slip back into old and familiar routines, with the exceptionally trying events of 2020 and early 2021 now in the rear-view mirror.

It was a long, tough haul, but together we made it through and together we will be stronger. Now it's time to make up for lost time and work more efficiently and with greater productivity.

At Saucon, we're here to support you in this new, leaner and more challenging business reality. Our transportation technology experts are always in search of new ways to help you work smarter, and make the passenger experience more rewarding.

Our revolutionary Prox device is at the heart of everything we offer. Released in 2006, the original Prox box established a new benchmark for innovation by transforming the way we operate on a daily basis.

The unit has enjoyed an unprecedented lifespan; a testament to the enduring solutions we release to market. Just think about where technology was 15 years ago: flip phones were in, smart TVs were unheard of, and Alexa was someone you knew who lived down the road.

Once again leading the way

The next revolution is now on the horizon. A product of three-plus years of software engineering, troubleshooting and rigorous testing, our new Prox II ME device is destined to take the transportation industry further than ever. It's faster, more versatile and switches easily in-and-out with your existing Prox device. It's also been thoroughly tested, both in-house and with accredited third-party suppliers, to offer guaranteed quality, handle the harshest conditions and deliver a high level of security.

As we roll out our new Prox II ME device, rest assured that we are committed to providing you with all the technical and client support you need to make your switchover seamless. We have a bright future to look forward to. We look forward to being a part of your future success for many more years to come.

Sincerely,

Bill French
President
Saucon Technologies

Prox II ME Better. Faster. Smarter.

Prox II ME Better. Faster. Smarter.

The new IoT standard in one powerful box

A new era in transportation technology is upon us. Prox II ME is ready to take your business even further with 4G LTE wireless connectivity. Future versions of Prox II ME will include Bluetooth functionality that will communicate with onboard devices such as hand-held devices, temperature sensors, wheel-end monitoring and more. It's the ultimate solution to ensure your staff and fleet are working as efficiently as possible while enhancing the passenger experience, for maximum ROI.

The latest evolution to support your vehicle health and productivity needs.

Prox II ME

- Optimized for IoT
- Designed for lower data usage
- Optimized specifically for telematics use cases
- Extended range and connectivity to cell towers

Advanced Prox II ME Features and Benefits

Secure Linux system is the gold standard in security. Saucon has invested heavily in third-party testing to ensure the most hacker-proof, iron-tight system on the market.

IP67 rated to stand up to today's demanding road conditions. Saucon has gone the extra mile to test Prox II ME from every conceivable angle, ensuring the most waterproof, weather-proof, tamper-proof and road-proof unit on the market.

Enhanced processors provide more data edge processing, plus vastly improved speed and memory. Multiple inputs including USB, CAN (Autobaud 250K and 500K) and optional automotive ethernet (10/100MB) provide connectivity across a wide range of devices.

The latest in Bluetooth connectivity (low energy 4.0 or 5.0). Future versions of Prox II ME will allow for near-realtime remote monitoring, temperature monitoring, vehicle sensor monitoring and more.

Internal GPS antenna saves the need to purchase and install a costly external antenna.

Rest assured, Prox II ME is backwards compatible

To make your life easier, our new unit is compatible with your existing harness, while the internal antenna and GPS means fewer moving parts. Simply switch out your Prox with the new Prox II ME and you will be future-ready for years to come.
