

BUS TALK

KEEPING COMPANIES MOVING AT THE SPEED OF INNOVATION

Trailways / ABA / IMG / UMA 2024 SAUCON

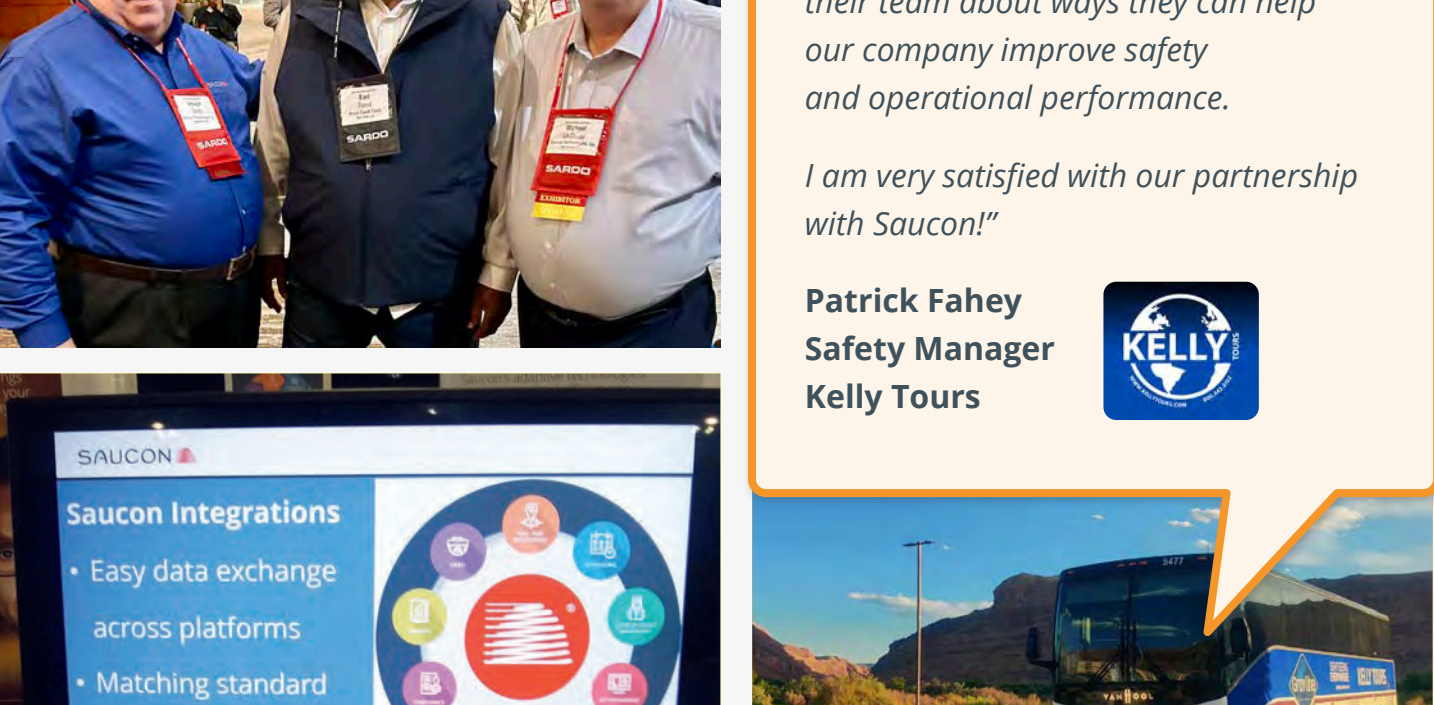

It's Showtime!

Mike McDonal, Director, Regulatory Compliance and Industry Relations at Saucon, discusses a comprehensive overview of Saucon's Fleet Management, Compliance and Driver Safety.

It was exciting to catch up with some friendly faces at the latest trade show events.

Saucon participated in several key industry tradeshows and conferences at the start of 2024, including Trailways, the American Bus Association (ABA), the International Motor Coach Group (IMG), and the United Motorcoach Association (UMA). These events provided an opportunity for Saucon to reconnect with its users, partners, and friends, while also discussing important industry topics. Additionally, Saucon was excited to introduce new initiatives, such as data integration partnerships with Initek Consulting and The Bus Network (TBN).

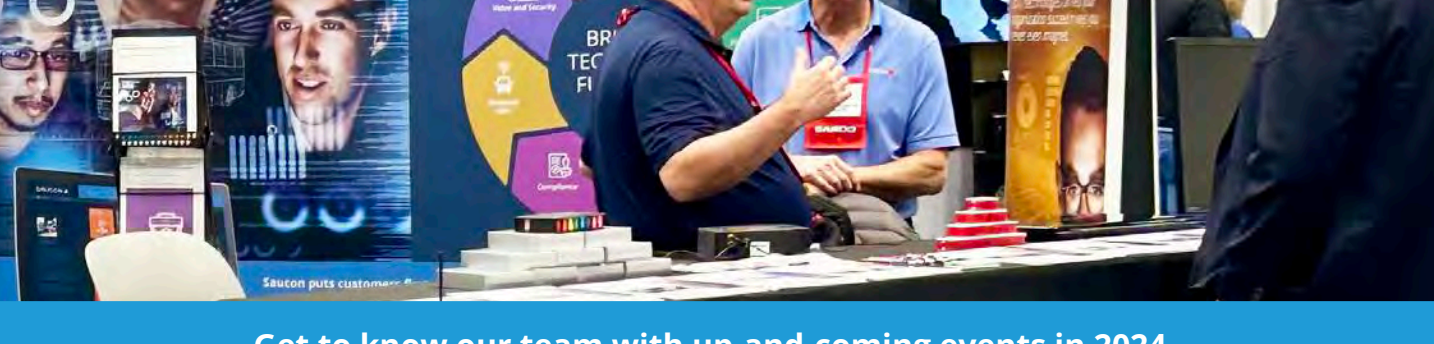

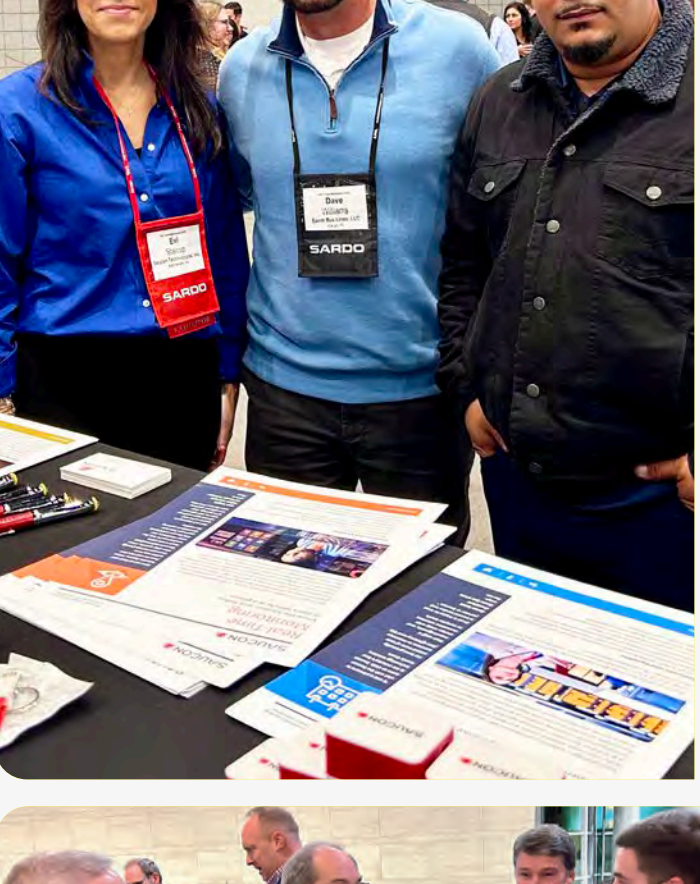

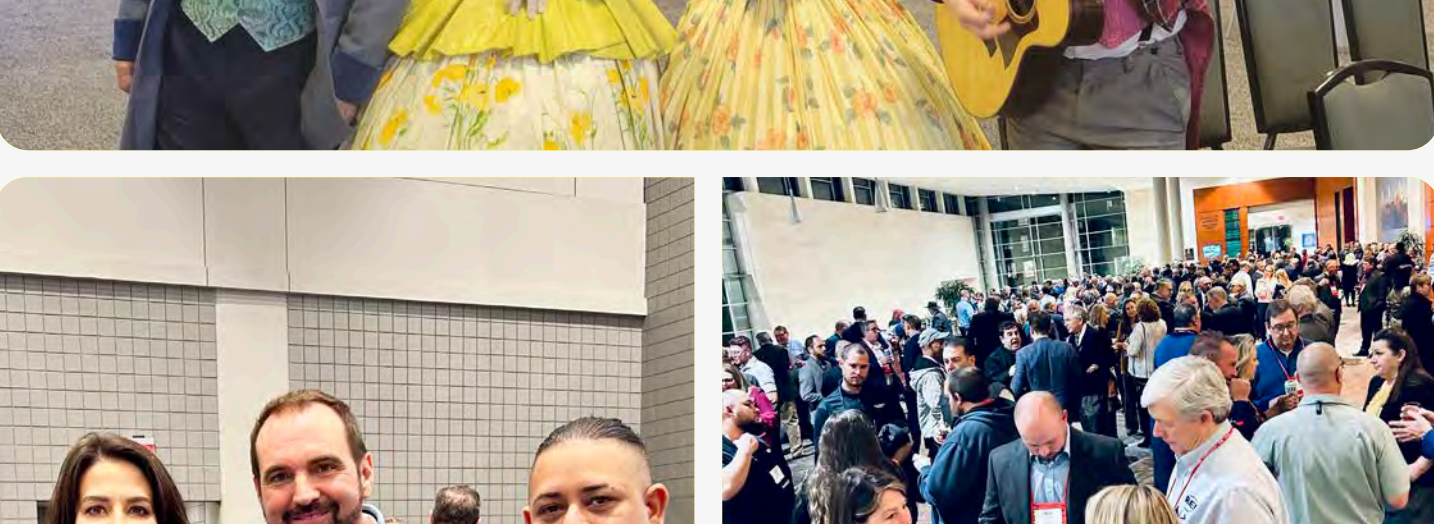

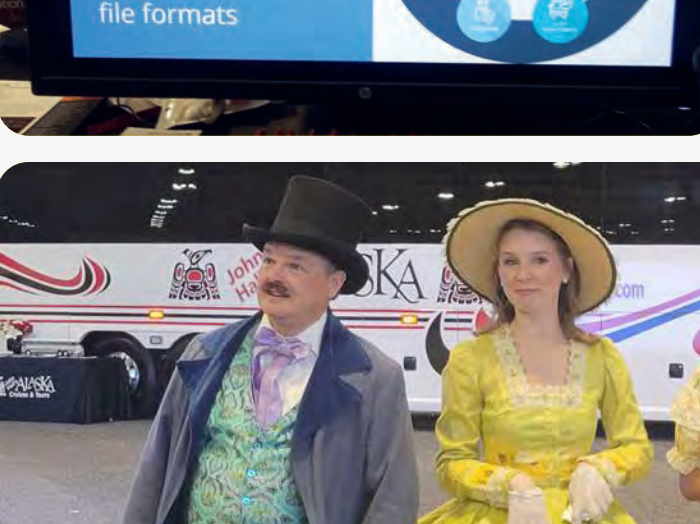

"It was great meeting with Saucon at UMA this year."

It's always a pleasure talking to their team about ways they can help our company improve safety and operational performance.

I am very satisfied with our partnership with Saucon!"

Patrick Fahey
Safety Manager
Kelly Tours

SAUCON SPOTLIGHT

Saucon Product Discovery Sessions

Throughout 2024 Saucon is excited to bring you a series of "quarterly" Product Discovery sessions.

Compliance

"It was a productive session."

It provided a comprehensive overview of the Compliance features and benefits, was well-organized and effectively communicated the value of the product.

We use the system every day and it saves us a lot of time while providing all the important information we need for Compliance."

Anisette Archo
Safety Department Assistant
DC Trails, INC.

Saucon will notify you of upcoming sessions.

If there are any questions or to register for a session, please contact Mike McDonal at: mmcdonal@saucontech.com

WE KNOW BUS™ Portal Education 2024

Do you know Real-Time Monitoring?

Real-time tracking with complete data analytics for better business decisions.

Saucon's TDS Map solution supports a variety of GPS capabilities including:

- Graphical Mapping
- Vehicle Tracking
- Geo-zone Fencing
- Scheduling
- Arrival Forecasting
- Full Operational Reporting
- Driver Logs
- Customer Mobile Apps

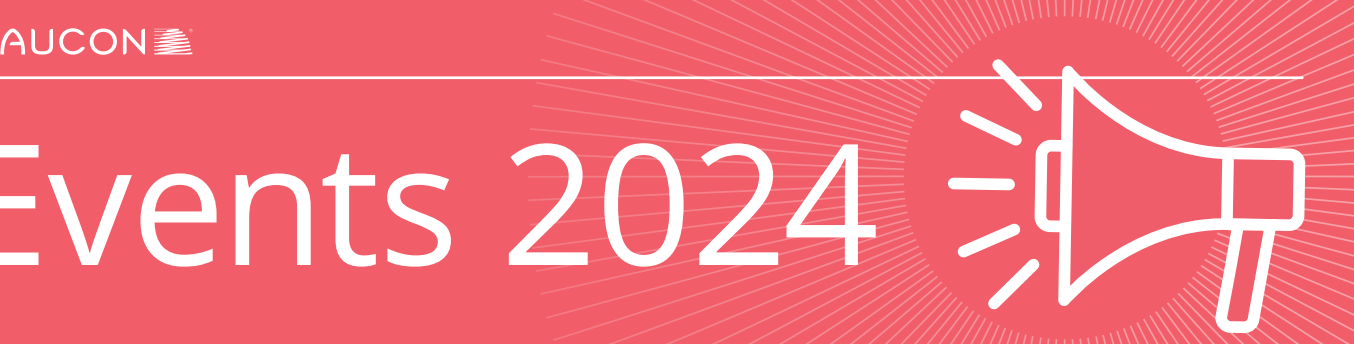

The mapping displays all active vehicles, vehicle speed, location, driver, and date and time of last report, and is fully integrated with Google Earth and all associated capabilities.

The geo-zone fencing definitions enable drawing routes. It can track your fleet activity through a secure web-based portal with analytics and data feeds.

Real-Time Monitoring is part of Saucon's full range of leading-edge integrated solutions. [View More Details](#)

Successful Integration Partnership

Saucon has expanded its relationships with data integration partners by recently collaborating with **Initek Consulting** and **The Bus Network (TBN)**.

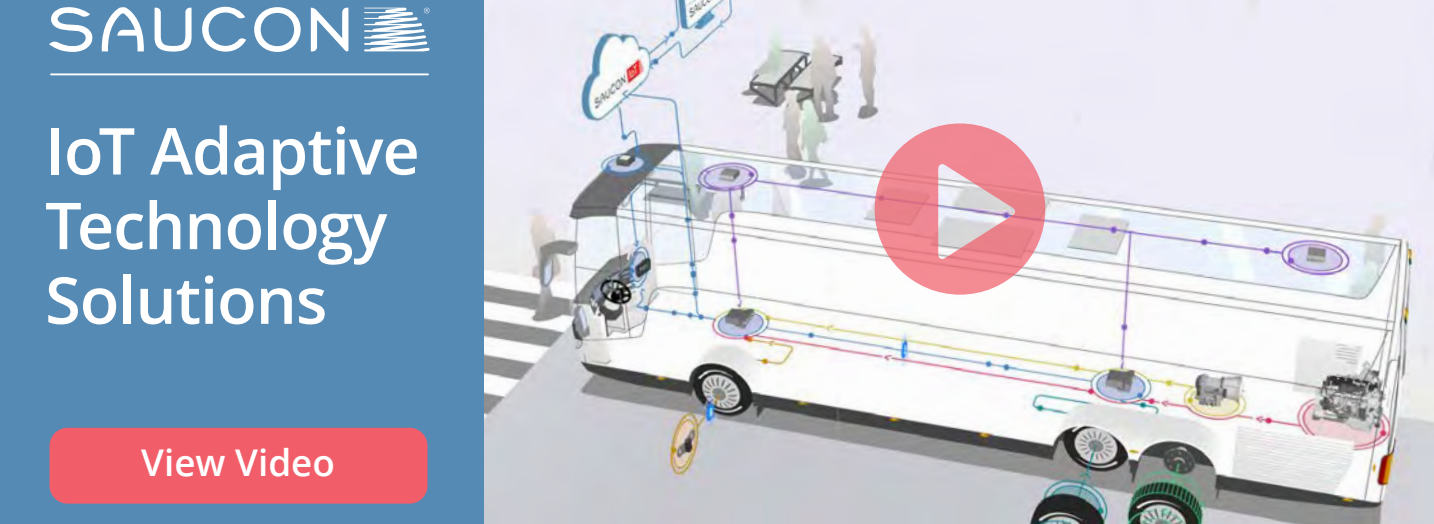

As a result of this partnership, real-time data can now flow between Saucon and The Bus Network, providing complete integration of data to support all the operational tools within TBN's Charter Management Reservation System.

For more information about integrating with The Bus Network (TBN). Contact us at: TDSinfo@saucontech.com
